

VARIAN PIANO

TAV. 2.	IL SINDAC
---------	-----------

The figure displays an aerial map of a coastal region, likely a beach or dune area, overlaid with a grid system. The map is color-coded according to different land parcels, which are labeled with codes such as 10001, 10002, 10003, etc. A legend at the top left identifies these parcels with green, yellow, and black patterns. A second legend at the top right defines five categories of infrastructure areas:

- seconda categoria
- terza categoria
- quarta categoria
- viabilità locale
- percorsi ciclo-pedonali

The map shows a dense network of linear features representing paths or roads, particularly concentrated along the right edge. These features are categorized into the first three items listed in the legend. The fourth category, "viabilità locale," is represented by a series of small black dots forming a jagged line along the coastline. The fifth category, "percorsi ciclo-pedonali," is shown as a single thick black line running parallel to the coast.
